## Background:

A skilled ASP.NET developer with over ten years of experience in the Information Technology sector, specializing in both backend and frontend software development. With more than five years dedicated to ASP.NET development, expertise spans process automation, microservices design, and event-driven systems. Proficient in containerizing applications using Docker, managing Unix-based environments through Ansible and CI/CD pipelines, and ensuring seamless database management across relational and object databases. A proven track record in designing software architectures that are understandable, extendable, and maintainable.

Currently serving as a Software Engineer at Tiplu GmbH since September 2021, with previous roles including Web Development at DaviesMeyer GmbH and Senior Forensic Analyst at PricewaterhouseCoopers. Recognized for delivering high-quality, efficient software solutions, and driving innovation within development teams.

## Key Work Experience:

- Software Engineer at Tiplu GmbH, September 2021 to current
- Web Developer at DaviesMeyer GmbH, October 2018 to September 2021
- Senior Digital Forensic Analyst at PricewaterhouseCoopers, July 2016 to September 2017
- Digital Forensic Analyst at PricewaterhouseCoopers, July 2014 to July 2016

## Relevant Certifications:

- iSAQB CPSA-F
- Docker 'Master' (Udemy)

## Relevant Achievements:

- Presenter at monthly C# Hamburg meetup
- Co-authored "Accelerometer and Spatial-Orientation Interfaces to Maze Games on Tablets and Mobile Devices"

## Relevant Education:

- Bachelor of Computer Science (Software Engineering)  
Massey University, New Zealand
